EDUCATION

2025 **Ph.D., Speech, Language & Hearing Sciences**

Boston University

Dissertation: *A Multimodal and Naturalistic Approach to Assessment in Aphasia*

Advisors: Swathi Kiran & Einat Liebenthal

2016 **M.S., Communication Disorders**

State University of New York at New Paltz

2014 **B.A., Speech & Hearing Science**

University at Buffalo

RESEARCH EXPERIENCE

Department of Neurology, Johns Hopkins University School of Medicine

2025– **Postdoctoral Research Fellow**

[SCORE \(Stroke Cognitive Outcomes & REcovery\) Lab](#), PI: Argye E. Hillis

T32 NRSA Fellow, Kennedy Krieger Institute

- Built machine learning pipeline combining cortical parcellation volumes, white matter tract integrity, and lesion-network disconnection scores with acute clinical variables to predict 12-month language recovery trajectories
- Administering HD-tDCS to acute stroke patients in the Emergency Department as part of the TESSERACT-II cerebellar tDCS clinical trial; managing REDCap protocol and session workflows
- Designing a waitlist randomized controlled trial using cerebellar neuromodulation guided by algorithmic prediction for treatment staging

Institute for Technology in Psychiatry, McLean Hospital, Harvard Medical School

2024–2025 **Senior Clinical Research Assistant**

[The Functional Neuroimaging & Bioinformatics Lab](#), PI: Einat Liebenthal

- Designed and implemented a multimodal naturalistic paradigm combining continuous affect ratings, eye-tracking, and movie-viewing to assess language-emotion coupling in post-stroke aphasia and mild cognitive impairment
- Recruited and tested 100+ participants (persons with aphasia, MCI, and neurotypical controls) across behavioral and neuroimaging sessions
- Developed automated multimodal media analysis integrating ASR (Whisper), LLM-based scoring, and acoustic-prosodic feature extraction for scalable narrative discourse assessment

Sargent College of Health & Rehabilitation Sciences, Boston University

2020–2025 **Doctoral Student Research Assistant**

[Center for Brain Recovery](#), PI: Swathi Kiran

- Applied machine learning to predict naming recovery in bilingual post-stroke aphasia using dual-language proficiency, imaging, and demographic features
- Quantified cross-language treatment generalization in bilingual and trilingual aphasia across multiple single-case and group designs
- Created and validated the LEX-BADAT open dataset characterizing language experience profiles in bilinguals with and without aphasia
- Analyzed social determinants of health associated with poststroke communication difficulties in U.S. Hispanic populations using NHIS data

State University of New York at New Paltz

2015–2016 **Graduate Student Research Assistant**

[Department of Communication Disorders](#), PI: Dana Arthur & Inge Anema

- Investigated training effects on suprasegmental features in oral reading of non-native English speakers

University at Buffalo

2013–2014 **Undergraduate Student Research Assistant**

[Center for Orofacial Pain Research](#), PI: Richard Ohrbach

- Examined effects of repeated anodal transcranial direct current stimulation of motor cortex on visuo-motor task performance
